Letters
a Guide for Improving them

U.S. Department of Agriculture
Office of Personnel, Washington, D.C.
Administrative Series No.14   Issued June 1951

DEPARTMENT OF AGRICULTURE
WASHINGTON

JUNE 15, 1951.

To: Fellow Employees

From: Charles F. Brannan, Secretary

Subject: Writing Effective Letters

Most of you at some time or another write letters—and good letters, too—about our programs of the Department. However, it will do none of us any harm to be cautioned occasionally so that we will not become careless in the style and the tone of our letters.

Every letter that goes out from our offices should be correct, clear, concise, and written in a friendly and courteous manner. It should be correct not only in facts and in conformance to policies, but it should also be grammatically correct. I like letters that have a neat appearance and are written in simple, direct language. A long, rambling letter with a lot of fancy words and phrases will not set so well with a farmer who is plowing on a hot day when the rural mail carrier brings his letter.

I want to stress particularly the importance of answering all correspondence promptly.

This booklet gives some suggestions which we hope will make it easier for you to write effective letters.

Charles F. Brannan

CONTENTS

I. Importance of Letters in Administering the Programs of Our Department

A great deal of our business is carried on through correspondence with our various offices, other Government agencies, farmers, educational institutions, business and commercial organizations.

II. Importance of Letters in Public Relations
Goodwill Ambassadors

Letters are one of the most important contacts between Government agencies and the public—sometimes the only contact.

The public is entitled to expect prompt, intelligent replies to all requests.

An adverse opinion may be formed of our Department from a single letter written by one of our employees.

III. Planning the Letter

Things to be kept in mind

    WHY is the letter being written?
    WHO will receive it?
    WHAT facts or ideas should be included ?
    HOW should the ideas be presented?

A. WHY is the Letter Being Written?
Is it to—

Answer an inquiry?
Ask a favor?
Seek information?
Convey information?
Instruct or advise?
Produce a favorable opinion regarding the programs of the Department?

B. WHO Will Receive the Letter?
Keep in mind the person who will read the letter; consider the reader's—

Familiarity with our programs
Knowledge of Government procedures
Interest and attitude
Point of view when reading the letter

Have a mental picture of the addressee; try to understand his problem; and adapt the language to his vocabulary.

C. WHAT Facts or Ideas Should Be Included?

Do you know all you should about the subject on which you are writing?

Examine the files thoroughly and talk with other persons who have additional helpful information

Some letters may require the use of facts and information regarding—

    Policy matters
    Regulations
    Program activities
    Research data
    Statistics
    Procedural and instructional materials

D. HOW Should Ideas Be Presented?
Prepare a written or mental outline as a guide for presenting your ideas

    The outline may consist of—
        Words
        Phrases
        Short sentences

    Your plan for presenting your ideas should be—
        Concise
        Logical in sequence; coherent
        Complete; contain main topics to be developed

IV. Building the Letter

Keep in mind that your letter is built of—

Paragraphs—Groups of related sentences
Sentences—Groups of related words
Words—The smallest units of speech which have meaning

A. Paragraphs

1. Arrangement of paragraphs

This is an important part of planning a letter. Decide what main ideas you want to present. This will determine the number of paragraphs.

Place emphasis where emphasis is desired, by proper arrangement of paragraphs

Attention may be called to an idea by—
- a. Giving it a prominent position
- b. Giving it more space
- c. Repeating it in a number of forms
2. The *First* and the *Last Paragraph* are the most "strategic"

The *First Paragraph* should get "Off to a Good Start"—tell the reader at a glance what the letter is about

It should begin, when possible, with information of particular interest to the reader. It may briefly identify or acknowledge the incoming letter.
Example—"We appreciate your letter of May 7 about the Honor Awards Program."

The *Last Paragraph* leaves the final impression

It should indicate clearly the action which the reader should take, if action is desired.
Example—"We shall appreciate your completing and returning the attached form by April 20."
3. Constructing Each Paragraph

A paragraph should convey ONE PRINCIPAL thought; all other sentences of the paragraph should relate to this one thought, developing it fully.
The Topic Sentence

The central thought of a paragraph is frequently expressed in one sentence called the "topic sentence." The topic sentence usually opens the paragraph and should tell the reader what the paragraph is about.

Develop the Topic Sentence with—
      a. Facts, particulars, and details
      b. Specific instances or examples
      c. Reasons—cause or effect
      d. Comparison or contrast
      e. Testimonies

Facts, Particulars, and Details

Example—"Farmers derive many benefits from the provisions of the act. Some of these benefits are . . ."

10
Specific Instances or Examples

Example—"Experience has shown that farming in a particular area can be successfully changed from a one-crop system to diversified farming. For instance, near Jackson, Mississippi, most farmers had always followed the system of planting nothing but cotton. Now, they rotate their crops . . ."

Reasons—Cause or Effect

Example—"We are unable to grant your request because of several conditions. The law provides . . ."
Comparison or Contrast

Example—"Agriculture today is comparatively prosperous when we consider conditions in 1931. At that time . . ."

Testimonies

Example—"Mrs. Jones reports that she has saved several dollars on food as a result of the training received from the Home Demonstration Agent."
4. Sentence Sequence in the Paragraph

Sentences of a paragraph should follow a logical and natural order. This may be done in three ways:

    a. Repeating important words
    b. Using personal and demonstrative pronouns, and demonstrative adjectives
    c. Using connectives

Repeating Important Words

Example—"We shall be glad to notify him that his *report* has been referred to the chief of the division. The *report* . . ."

Using Personal and Demonstrative Pronouns and Demonstrative Adjectives

Example—"Many farmers and business organizations take advantage of technical advice and assistance available from the Soil Conservation Service, the Extension Service, Forest Service, the Research Bureaus and other agencies of the Department. *These* agencies . . ."

Using Connectives

Examples of some of the connectives which may be used:

although	at least	consequently
yet	especially	surely
nevertheless	besides	certainly
in contrast to	in such case	in fact
for instance	furthermore	. therefore
B. SENTENCES

Sentence construction, the manner in which words are put together, is an obvious weakness of many letters. State your ideas clearly, in logical order, and in relationship with each other so your reader will not have to grope for your intended meaning

1. Construct your sentences so the reader *not only can understand them*—but *cannot misunderstand them.*
2. Avoid long, rambling, shapeless sentences.
3. Express one thought in each sentence.
4. Place the main thought in the main clause; not in a subordinate position.

Be sure your sentences Can Be Understood and Cannot Be Misunderstood
Avoid Long, Rambling, Confusing Sentences

Don't be a "Clothesline" writer, trying to put everything in one sentence.

Long, rambling sentences cause misunderstanding, confusion, and waste of the reader's time. If you have the habit of writing this type of sentence, take a little more time to plan what you want to say. Form the habit of using periods more frequently.

Example—(89 words in one sentence)

"The following rule should be followed: If an employee had completed his waiting period prior to August 7, 1949, the old regulations apply and a recomputation is not necessary; if the employee had not completed his waiting period on or before August 6, 1949, that is, his waiting period was still open on August 7, the new regulations apply and a review should be made to determine that periods of leave without pay or periods of service prior to separation are given proper consideration in computing the waiting period."

"Break Down Long Sentences"

The sentence above can be much more easily understood if it is *broken down* or if periods are inserted.

Example—"This rule should be followed: If an employee had completed his waiting period prior to August 7, 1949, the old regulations apply and a recomputation is not necessary. If the employee had not completed his waiting

period on or before August 6, 1949 (that is, his waiting period was still open on August 7), the new regulations apply. In such case a review should be made to determine that the periods of leave without pay, or periods of service prior to separation, are considered in computing the waiting period."
Express One Idea or Thought in Each Sentence

Examples:

Unrelated ideas—"Mr. T. T. Brown was given the assignment and he is an experienced conference leader."

Stated in a Related Manner—"Mr. T. T. Brown, an experienced conference leader, was given the assignment.

Place the Main Thought in the Main Clause; Not in a Subordinate Position

Weak	*Better*
"We suggested that he formulate a work plan for the survey, which he did."	"He formulated a work plan for the survey, as we suggested."
C. Words—Word Order

Clearness and correctness demand that the words of a sentence be arranged so there can be no doubt of the exact meaning.

1. Place modifiers next to the words they modify.
2. Use connectives with discrimination.
   a. Coordinating connectives join parts of equal rank.
   b. Subordinating connectives join parts of unequal rank.
3. Avoid shifts in construction.
   a. Use parallel structure.
   b. Avoid inconsistent shifts in subject or voice, person, number, and gender.
4. Don't hide important ideas.

Misplaced Modifier

Misplaced modifiers can convey the opposite meaning to that intended.

Examples—

WRONG MEANING—"He *only* is responsible for two counties."
CORRECT MEANING—"He is responsible for *only* two counties."

Coordinating Connectives

Coordinating connectives (and, moreover, but, and yet, or therefore, for example) join equal parts. These conjunctions enable you to express ideas of addition, contrast, alternation, consequence, or explanation.

Subordinating Connectives

Subordinating connectives (although, because, since, when, whereas, if) enable you to show the relationship of ideas. Do not join one idea to another by "and" unless the ideas are logically equal.

Avoid Shifts in Construction

Confusion may be avoided by using parallel structure to express parallel thoughts. Be consistent in the use of infinitives, participles, clauses, or phrases. Your verbs must agree with the subjects in number. Pronouns which refer to antecedents must agree with the antecedents in person, number, and gender.

Example—"A number of *employees* will be required to work on Saturday, in which event *they* will be given compensatory time off."

Dont Hide Important Ideas

Place the important idea at the beginning or at the end of the sentence—where it will get attention.

Instead of	*Say:*
"Replying to your letter of March 16 regarding a farm-record study, we wish to advise that the study has been sent to the State Land-Grant College—BAE Committee."	"The farm-record study, about which you inquired on March 16, has been sent to the State Land-Grant College—BAE Committee."

V. Language of Your letter

Your letter is a substitute for a personal interview. Use language that is appropriate; such as you would use in conversation with the addressee. Select and use language which has clearness and dignity—which is *simple, easily understood,* and *courteous.*

Avoid the use of—

Obsolete phrases
Hackneyed expressions
Inexact and slovenly-used words
Too much language
Pompous, high-hat phraseology
Dangerous words

Obsolete Phrases

Obsolete phrases, that were used and considered appropriate several generations ago, amuse the reader and distract his attention from the message.

Hackneyed Expressions

Hackneyed expressions sap the life from the message, and lull the reader to sleep instead of moving him to action.

Inexact and Slovenly-Used Words

Inexact and slovenly-used words make a poor impression, lead to misunderstanding, and may necessitate further correspondence.

"Too Much Language"

One of the most common weaknesses of our letters, perhaps, is the use of too much language. Even simple, easily understood words may confuse the reader when 10 words are used where only 5 are needed.

Instead of:
"Please be advised that we have read your report and consider it an excellent analysis of this important question."

Say:
"We consider your report an excellent analysis of this important question."

Pompous, High-hat Phraseology

Pompous, high-hat, highly technical, scientific, and complex words baffle and confuse the reader.
Dangerous Words

The *tone* of the letter to a large extent depends upon the choice of words. Some words suggest or imply doubt or question; others are demanding; others suggest lack of strength. Such words create an unfavorable reaction and are "dangerous."

VI. Standards of an effective letter

A study of this section will assist you in reviewing letters prepared by your subordinates and in analyzing your own correspondence.

Most of the standards given below may be considered the "C" of a good letter:

Completeness
Conciseness
Clearness
Correctness
Courtesy
Neatness
Readability

Completeness

Letters must give all necessary information to accomplish their purpose. Incomplete letters may necessitate additional correspondence, exasperate the addressee, and create doubt regarding the efficiency of the Department.

Conciseness

Get to the point. Say what you have to say in the fewest words consistent with clearness, completeness, and courtesy.

CLEAR AS A BELL

Clearness

Every letter should be written so it not only *can be understood,* but *Cannot Be Misunderstood.* Remember, clear thinking precedes clear expression.

$$2+2=4$$
$$3 \times 3 = 9$$
Correctness

Misstatement of facts, and statements made contrary to policy or procedure, may cause serious damage. Also, be sure that your letters are correct from the standpoint of grammar, spelling, punctuation, and typographic style.

Courtesy

How something is said is as important as *what* is said. Determine the *tone appropriate* for your message before you start dictating. Ask yourself: Should the letter be matter-of-fact, formal or informal, firm, convincing, persuasive, regretful, or grateful?

NEAT AS A PIN
Neatness

The appearance of the letter usually creates the first impression. Your letters should always be neat, well-arranged, free from strikeovers, obvious erasures, uneven typing, and misleading punctuation. Be sure that your secretary or stenographer understands and uses the Department's Correspondence Style Manual as a guide for the preparation of all forms of correspondence.
Readability

The Flesch Readability Formula, Section VII, gives you detailed instructions for running a Readability Test on your writing to determine Reading Ease and Human Interest.

Here are some general standards—

     Average sentence length—17 to 19 words
     Syllables per 100 words—150
     Use about 6 personal words per 100 words.
     Use personal sentences.

If you want more complete subject matter on letter writing, you may wish to purchase the booklet, Getting Your Ideas Across Through Writing, from the Government Printing Office, Washington, D. C. This recommendation is made in addition to the references listed in the Bibliography, Section VIII.

VII. Flesch Readability Formula

We Can Use Standards for Measuring Our Writing

Many of us check our weight by stepping on the scales from time to time and then checking our poundage with standards based on height and age. Scales and standards also exist for measuring our writing. One scale available for measuring readability and reader acceptance is the Revised Flesch Formula.

Dr. Rudolph Flesch is an authority on the measurement of readability and reader acceptance of written material. He is author of the book, "The Art of Plain Talk." The text material, charts, and reference to the Revised Flesch Formula have been duplicated by his permission.

Four Main Ideas

1. The *more syllables* in a word the harder it is to read and understand.
2. The *more words* in a sentence the harder it is to read and understand.
3. The *more words about people* in the letter or written material the more interesting it is.
4. The *more sentences addressed to the reader* the more interesting it is.

Goals

Do you want people to read what you write—read it easily and with interest? If so, aim at these goals:

1. Shorten your sentences to an average of 17 words.
2. Shorten your words to 150 syllables per 100 words.
3. Use about 6 personal words per 100 words, and
4. Use personal reference sentences.

With the attainment of these four goals your writing will rate high in *Reading Ease* and *Human Interest.*

How We Measure Reading Ease

Word syllables and the *average number of words per sentence* are combined as a measure of READING EASE.

Step I. If your article is very short, test it all. With longer articles or books, pick samples by a strictly numerical scheme. For example, use the first hundred words of each tenth page, beginning at the first paragraph.

Step II. Select a 100-word sample. Bracket the 100th word. Count contractions and hyphenated words as one word. Count as words any numbers and letters separated by spaces. For example, each of the following is counted as one word— 1948; a; 19,892; H. I.; R. E., e. g.; 8.1; 100-word; 9th.

Step III. Count the syllables in your 100-word samples. To save time, underscore all syllables *except* the first in all multisyllable words. Count the underscores and add 100. Count syllables the way you pronounce the word. For example: Asked (1); de̲te̲rmi̲ne̲d (3); se̲pa̲ra̲te̲d (4); pro̲nu̲nci̲a̲ti̲o̲n (5). Count the number of syllables in symbols and figures as they are normally read aloud. Example: $ (2); 1916 (4); 27 (4).

It is helpful to "read silently aloud" while underscoring. When in doubt, consult a good dictionary.

Step IV. Find the sentence that ends nearest the 100-word mark. Count the sentences up to that point. Divide the number of sentences into the total number of words. For example: 96 words ÷ 8 sentences = 12 word average per sentence.

In counting sentences, follow the units of thought rather than the punctuation. Usually sentences are marked by periods; but sometimes they are marked by colons and semicolons—like these. (Count the preceding sentence as three sentences.) Don't break up sentences that are joined by conjunctions like "and" and "but." Apply *number of syllables* and *sentence length* to the Reading Ease Chart on the opposite page.

To use this chart, lay a straight edge or a sheet of paper from the "Number of Syllables" per sample to the "Average Sentence Length". The "Reading Ease" Score is read directly on the middle scale. *Example:* 150 syllables and 10 words per sentence equals 70 "Reading Ease Score".

24

How We Measure Human Interest

Words about people and *percentage of personal sentences* are combined as a measure of HUMAN INTEREST.

Step V. Count the number of "personal words" in your 100-word sample and mark them with a small circle. "Personal Words" are:

A. All first, second, and third person pronouns—I, we, they, etc. Do not count the neuter pronouns—it, its, itself. Do not count they, them, their, and themselves, when they refer to things rather than people.

B. Count singular and plural forms of all words that have masculine or feminine gender, e. g., John Jones, Mary, father, sister, iceman, actress. Do not count common gender words like teacher, doctor, employee, assistant, or spouse.

C. Group words—folks and people—when used with a plural verb.

Step VI. Count the number of "personal sentences" in your sample. "Personal sentences" are:

A. Sentences marked by quotation marks, including speech tags set off by colons or commas (e. g., "I doubt it."—"We told him."—"You can take it or leave it."—"That's all very well," he replied, showing clearly that he didn't believe a word of what was said.)

B. Questions, commands, requests, and other sentences directly addressed to the reader (e. g., Does this sound impossible?—Imagine what this means.—Do this three times.—This is a point you must remember.—It means a lot to you and me.)

C. Exclamations (e. g., It's unbelievable!)

D. Grammatically incomplete sentences whose full meaning is clearly inferred from the content. (e. g., Doesn't know a word of English.—Handsome, though.—Well, he wasn't.—The minute you walked out.)

If the sentence fits more than one definition, count it only once.

Step VII. Divide the number of sentences found in Step IV into the number of "personal sentences" found in Step VI. This gives the percentage of "personal sentences."

"Apply" the number of "personal words" and the percentage of "personal sentences" to the Human Interest Chart.

VIII. Bibliography

Aids for dictator, stenographer, and typist

GOOD USAGE; GRAMMAR, PUNCTUATION AND SENTENCE STRUCTURE

Brooks, C.
> FUNDAMENTALS OF GOOD WRITING. New York, Harcourt, Brace [1950] 523 p.
>> A practical handbook of modern rhetoric.

Brown, T. L., and Others.
> SECRETARY'S DESK BOOK; a modern guide to correct English with approved forms for business, official, and social correspondence, by William J. Pelo; incl. the WINSTON DICTIONARY; intermediate ed; ed. and rev. annually by Winston dictionary staff. Philadelphia, Winston, 1945.

Fernald, J. C.
> ENGLISH GRAMMAR SIMPLIFIED; ITS STUDY MADE EASY. Rev. ed. New York, Funk and Wagnalls, 1946. 270 p.
>> A handy, compact reference for anyone who needs quick answers to questions about English usage.

Greever, G. and Jones, E. S.
> THE CENTURY HANDBOOK OF WRITING. 4th ed. New York, Appleton-Century-Crofts, 1942. 364 p.
>> A convenient reference to material dealing with grammar, diction, spelling, sentence structure, and related topics.

Hutchinson, L. I.
> STANDARD HANDBOOK FOR SECRETARIES. 6th ed. New York, McGraw-Hill, 1950. 616 p.
>> A good reference book to answer questions about capitalization, spelling, pronunciation, letters and letter writing, and numerous other subjects with which a secretary should be familiar.

Jespersen, O.
> ESSENTIALS OF ENGLISH GRAMMAR. New York, Holt, 1939. 387 p.
>> A standard English grammar.

O'Rourke, L. J.
> SELF-AIDS IN ENGLISH USAGE. Lake Alfred, Fla., Psychological Institute, 1947. 211 p.
>> This book presents an effective method by means of which anyone may master the essentials of English usage. It is a self-testing and self-teaching manual whereby one may develop a sure knowledge of the principles of correct expression.

Taintor, S. A.
> THE SECRETARY'S HANDBOOK. 7th ed. completely rev. New York, Macmillan, 1950. 573 p.
>> An authoritative manual for secretaries and stenographers.

Woolley, E. C., and Scott, F. W.
> COLLEGE HANDBOOK OF COMPOSITION. 4th ed. Boston, Heath, 1944. 452 p.
>> A guide to word usage, sentence structure, paragraphing, composition, grammar, punctuation, spelling, and letter writing.

STYLE MANUALS

A Manual of Style.
> 11th ed. Chicago, University Press, 1949. 497 p.
>> This volume of typographical practice contains rules for authors, printers, and publishers, together with specimens of type; also chapters on punctuation, spelling, tables, indexes, and formulas.

U. S. Dept. of Agriculture, Office of Personnel.
> CORRESPONDENCE STYLE MANUAL. Rev. U. S. D. A. Administrative Series 2, 40 p. 1949.
>> A ready reference manual for stenographers and typists designed primarily for the Department. It contains instructions for the preparation of letters, memoranda, reports, telegrams, circulars, orders, and other official documents and papers. The section on typographic style includes punctuation, capitalization, spelling, and other details of style.

U. S. Government Printing Office.
> STYLE MANUAL. Rev. ed. Washington, 1945. 435 p.
>> As the name implies, the book is intended to facilitate government printing. Its contents include suggestions to authors and editors, as well as guides for capitalization, spelling, compound words, abbreviations, numerals, punctuation, and miscellaneous information of interest to those concerned with the preparation of government letters, reports, and publications.

BUILDING A VOCABULARY: WORDS AND THEIR MEANINGS

Conklin, G. W.
> WORDS AS THEY LOOK. Cleveland, World Pub. Co., 1941. 376 p.
>> A quick-reference spelling manual, containing words which are often misused or misspelled, those which sound alike, but are of different spelling, and different meaning, and others with questionable spelling.

The references listed in this Bibliography may be obtained from the United States Department of Agriculture Library.

Fowler, H. W.
A dictionary of modern english usage. Oxford, Clarendon Press. 1949 742 p.
This work is a recognized authority on correct usage and is remarkable not only for the completeness of its information but for the wit and common sense with which it has been compiled.

Funk & Wagnalls.
standard handbook of synonyms, antonyms, and prepositions, by James C. Fernald. Completely rev. ed. by Funk & Wagnalls editorial staff. New York, 1947. 515 p.
A valuable reference book for those desiring to acquire facility in the use of the right word—the word that expresses the thought with the exact shade of meaning intended by the speaker or writer.

Hayakawa, S. I.
language in action. New York, Harcourt Brace, 1941. 345 p.
On the implications, connotations and emotional overtones of words, which may be just as important as their dictionary meanings.

Mencken, H. L.
the american language. 4th ed., corr., enl. and rewritten. New York, Knopf, 1947. 769 p.
Supplement 1–2. 1945–48. 2 v.
A comparison of the English of England and the English of America, with special emphasis upon the differences in vocabulary, syntax, idiom, and grammar.

Roget's.
international thesaurus. New ed. rev. and reset. New York, Crowell, 1946. 1194 p.
A complete book of synonyms and antonyms in American and British usage. The arrangement of words in groups according to the idea they express is designed to help the person whose memory does not produce the desired word promptly.

Smith, S. S.
the command of words. 2d ed. New York, Crowell, 1950. 305 p.
Methods of building one's vocabulary.

Webster's
dictionary of synonyms. Springfield, Mass., Merriam, 1942. 907 p.
A dictionary of synonyms with antonyms and analogous and contrasted words.

Webster's new collegiate dictionary. Springfield, Mass., Merriam, 1949. 1209 p.
This abridged dictionary which is based on Webster's new international dictionary defines 125,000 words. Besides definitions it contains such useful reference lists as arbitrary signs, names of persons and places. It is among the best of the desk dictionaries.

Webster's new international dictionary of the English language. 2d ed., unabridged. Springfield, Mass., Merriam, 1950. 3214 p.
This dictionary is the accepted authority for the United States Government Printing Office and also for the majority of printing presses and proofreaders throughout the country. The unabridged edition includes definitions of over 600,000 words, in addition to a brief history of the English language; sections on spelling and pronunciation; abbreviations; foreign words and phrases; a gazetteer on the principal geographical names of the world; and a dictionary of biography.

READABILITY

Flesch, R. F.
the art of readable writing. New York, Harper, 1949. 237 p.
A helpful guide to simpler and clearer expression of ideas. The principles set forth are applicable to letter and report writing.

Flesch, R. F.
how to test readability. New York, Harper, 1951. 56 p.
This book shows how to examine written material for the ease with which it can be read and understood. Suggestions for improving readability are given with sample passages.

WRITING THE LETTER

Aurner, R. R.
effective english in business. 3d ed. Cincinnati, South-Western Pub. Co., 1947. 582 p.
A practical and comprehensive reference book for letter writers with emphasis on the principles of clear, forceful expression.

Buck, C. E.
the business letter-writer's manual. New York, Doubleday, Doran, 1939. 232 p.
Designed to give business men and women helpful hints on the writing of business letters. Besides the chapters devoted to inquiry, collection, complaint adjustment and other types of letters, the book includes such sections as How to begin a letter, How to close a letter, and Hints of special value to the secretary and stenographer.

GILBERTSON, H. W.

EFFECTIVE EXTENSION CIRCULAR LETTERS—HOW TO PREPARE AND USE THEM. U. S. D. A. Misc. p. 403, 43 p. 1941.

Includes suggestions about the use of illustrations to stimulate interest, ways to make the reader aware of his problems, and the use of methods to increase the number of replies. The circular-letter check sheet at the end is of particular value to writers in testing their methods.

GRADY, J. F., and HALL, M.

HOW TO DICTATE BETTER LETTERS. New York, Harper, 1942. 118 p.
